Validation and Premium Service Plans

Description	Part Number
Comprehensive twice-yearly IQ/OQ of the System with full documentation provided to satisfy regulatory authorities. A comprehensive system test verifies, calibrates, and documents all system functions including readings, databases, alarms, dial-outs, outputs, reports, and user programming. Includes One Year Onsite Service Plan with 24/7 Technical Support. Includes approximately 100-page GMP/GLP IQ/OQ validation report, 1000 page software validation test report, calibration of temperature and humidity with traceable equipment, copies of reference equipment calibration certificates, and onsite refresher training at PM visit.	**VALSERV A** **VAL/SERV A 3YR Three Year Service Package**
Comprehensive Yearly IQ/OQ of the System with full documentation provided to satisfy regulatory authorities. A comprehensive system test verifies, calibrates, and documents all system functions including readings, databases, alarms, dial-outs, outputs, reports, and user programming. Includes One Year Onsite Service Plan with 24/7 Technical Support. Includes approximately 100-page GMP/GLP IQ/OQ validation report, 1000 page software validation test report, calibration of temperature and humidity with traceable equipment, copies of reference equipment calibration certificates, and onsite refresher training at PM visit.	**VALSERV B** **VAL/SERV B 3YR Three Year Service Package**
Complete IQ/OQ of the System. All Inputs Verified and Calibrated, Or Existing Customer Calibrations Rees-Certified.	**VALSECOND**
Service Contracts: One year service contract, parts and labor, and one-year tech service.	**SERVICE CONTRACT**
One year of technical service phone support.	**TECH SERVICE-1**

All specifications are subject to change without notice.

One month of technical service phone support.	**TECH SERVICE-M**
Premium Calibration Services: Five Point Certified Sensors with Certificate (RTD Sensors and High Accuracy Humidity Sensors)	**CAL-LOOP**
Three Point Calibration (available for those choosing to stay with thermistor probes and RTD's only) Three point calibration service. Field service technicians calibrate sensors using highly accurate dry blocks and probes. Printed certificates of calibrated points will be supplied.	**CAL-3POINT**
Alarm Limit Testing -More commonly referred to as "Fire and Ice" testing, the Alarm Limit Testing protocol is designed to prove that system will indeed alarm at each sensors set high and low alarm parameters.	**FIRE-ICE TEST**
Custom onsite calibration points for 3 point calibrations. Required in addition to 3 point calibration part number for each sensor being calibrated, when standard Rees calibration points are not used. Standard Rees calibration points are 937C,25C,-10C,-40C and -70C).	**CAL-3POINT-CST**
3 Point Onsite Calibration per Temperature Input. Standard Sensor - Range of calibration -40C to +100C. Includes Calibration Certificate. This option requires that the sensor wire is long enough to be removed from the unit at time of calibration service. If not #CAL-EXT will be required. Minimum of Quantity of 10 required. Note: Requires customer to provide Rees technician remote access to server on a mobile platform such as a laptop. (Note: Requires software Build 1020.15 or higher).	**CAL-3POINT-STD**
3 Point Onsite Calibration per Temperature Input. Ultra-Low Sensor - Range of calibration -80C to -40C. Includes Calibration Certificate. This option requires that the sensor wire is long enough to be removed from the unit at time of calibration service If not #CAL-EXT will be required. Minimum of Quantity of 10 required. Note: Requires customer to provide Rees technician remote access to server on a mobile platform such as a laptop. (Note: Requires software Build 1020.15 or higher).	**CAL-3POINT-UL**
Premium Sensor Calibration Protocols Available	

1007 Whitehead Road Ext Trenton NJ 08638 609.530.1055 www.reesscientific.com

Premium Calibrations

Standard Part Number	Factory Certified Options			Field Certified Options		
	17025- 3 POINT CERT: Calibrated by Rees Scientific certified Presidio Labs and technicians. Includes ISO 17025 certificate.	Add on Cert Available	17025 Single Point: CAL-17025	17025 Multi-Point: CAL-3POINT()	17025 Multi Point: SNAP-CERT-(): Trade out part # with Certified Sensor
