Improved Premium 3 Point Calibration

Make Your System More Accurate!

Better Equipment, Procedure, Software & Documentation!

We have enhanced our software and improved our three point calibration service.

Equipment:

* Highly accurate equipment = Highly accurate probes (within 0.1 degree at multiple points).

Procedure:

* Our factory trained field service technicians will calibrate your sensors using highly accurate dry blocks.

Software:

* The Rees software has been upgraded to account greater accuracy over the probes range.
* Increase your accuracy over the full range of the probes.

Documentation:

* Printed certificates showing 0.1 degree accuracy at the calibration points will be supplied.
* Our calculated uncertainties appear on the certificates.
* Meet the most stringent compliance requirements.
