

REES SCIENTIFIC'S COLD CHAIN MONITORING SOLUTION

Rees Scientific's proven hardware and technology is ideal for monitoring the temperature of critical equipment while being transported.

Integrate cold chain monitoring with your existing Rees System (no additional software is required).

Utilize the same proven hardware and communication options to meet customer infrastructure needs.

Protect your product conditions throughout its development stages (from the research lab, through the manufacturing process, ultimately to the end user).

Rees representative will thoroughly review and recommend your cold chain monitoring solution for you.

Increase patient safety

Ensure product reliability

Continuous Real-Time monitoring

Compliance – GxP and CFR Part 11 software solution for the cold chain market

View your equipment temperature conditions from desktop, tablet or smart phone

Monitor your critical equipment from your network or the cloud
