Continuous Temperature Monitoring

Rees Scientific has received new RMF (Risk Management Framework) ATO (Authority to Operate) with the DHA (Defense Health Agency) DoD (Department of Defense). This authorization will permit Rees Scientific to work on all military sites.

Advantages of Our Automated Monitoring System:

- Helps meet compliance in FDA, USP <797>, USP <800>, GxP, GMP, AABB, Joint Commission, AAALAC, USDA and more
- Preserves time, saves energy and resources
- Provides full software validation and on-site IQ/OQ
- Has the industries most sophisticated telephone alarm notification as well as escalating e-mail and text messaging
- Reduces loss and minimizes exposure to risk
- Generates user-defined reports based on time, date or activity
- Provides a secure encrypted SQL or Oracle Data Engine utilizing crystal reports
- Can be accessed from your PC, a tablet or a smartphone

Thank you for your service.

Continuous Temperature Monitoring

Rees Scientific has been servicing the military for over 35 years. We are the only known automated temperature monitoring supplier to have received the Authority to Operate with the DHA. We value our relationship with the military and are thankful for their services. Our goal is to provide them with a data enriched and quality automated monitoring system. We want to help ensure safety and avoid risk by making sure all critical refrigerators, freezers, incubators and other medical equipment/assets are monitored and maintained at all times.
