# REES DIALER OPTIONS

VOIP

Back View

CELLULAR

Rees Scientific has improved and expanded their capabilities and offer more options for their alarm dialing.

VOIP Dialer

* For use with virtualized Centron Presidio installation

* Constant connection to box

* Requires an analog phone line for operation

* Highest level of security for mission critical assets and events

* Optional 1 or 4 line dialer

VOIP Software

* Viable option for sites that don't own or want POTS line and TAPI modem

* Ability to leverage modern network infrastructure

* Less hardware required (eliminates need for modem, telephone line and internal connection of modem)

VOIP Backup Dialer

* Monitors phone line for connectivity

* Additionally, if the main phone line service is interrupted, the VOIP backup dialer will take over alarm duty

* Another safeguard ensuring your critical equipment is safe and protected

Cellular Dialer

* External Cellular Dialer to connect to customer provided PC
* Performs telephone alarm dial-out for the Rees Scientific Virtual Node and requires 1 external USB port
* Synthesized voice dial out capable of working with RSC customizable voice tags
* Comes with prepaid GSM SIM Card, but ongoing cellular service through a Cellular GSM telephone provider is required
* Can be main dialer or back up
