

# We Do Watering!

## THE 3 POINT PLAY

Brought to you by Rees Scientific.

- **Environmental Monitoring Systems**
- **Integrated Access Control**
- **Automated Watering Solutions**

**3 Solutions. One Source.**

**Design your Animal Facility space  
with the CentronEMS and  
our new **Animal Solutions.****

**Keep us in mind as you make major space,  
system and equipment design decisions for  
animal research and holding areas.**

# CRITICAL ISSUES FOR LABS

25 years of experience monitoring environmental conditions in laboratories has given us tremendous insight into other areas of research facilities. Working with our clients, we have designed the Triton Automated Watering Solutions.

Automated Watering Solutions help make the vivarium a better place for the animal residents and their caregivers. The Triton Automated Watering Solution improves water quality, ensures a constant supply, and reduces variances in the water supply that could affect research results. Staff is relieved of the laborious task of handling water bottles, which reduces the risk of ergonomic injuries and allows them to focus more attention on the animals themselves.

Our Automated Watering Solutions are custom designed to each client's specific needs. Our systems are available as Re-circulating, Auto-Flushing and hybrid systems. Reverse Osmosis, UV sterilization and water conditioning are all available. Systems can be constructed to service a specific species or with the flexibility needed to house a variety of species. Our engineers carefully review each project to design the system that best meets the current and future needs of the facility.

Our local sales representative would be more than happy to schedule a Lunch and Learn Seminar to provide you with more information. Like our product, our Lunch and Learns are tailored to your needs. We can provide a general introduction to our products, or discuss a specific project's needs in detail. Let us show you how partnering with Rees Scientific can help you meet and exceed your client's expectations.

**Protecting your client's valuable assets.**

# Automated Watering Solutions!

**Contact us to schedule a meeting to learn how we can partner with you on your next project.**
