

Centron Monitoring System right at your fingertips!

On your Smartphone

Instant access to your critical equipment on your smartphone or tablet anywhere in the world!

Or any Tablet

The industry leader for environmental monitoring, asset protection and loss prevention is the first to introduce access to your monitoring system through Smartphones. With our new Centron SQL software build 1016, all important information from your Centron Monitoring System is at your fingertips. You can take your monitoring with you, wherever you go. View equipment and reports, inhibit alarms and add comments, all from the palm of your hand. You now have the ability to see what's going on at your facility as it happens.
